

## DAPL FOLLOW UP

1. 09/16/2016: I spoke to Francine Johnson, ND Private Investigation and Security Board (NDPISB) in reference to DAPL security officers being license in North Dakota. The NDPISB had concerns that security officers were being brought to North Dakota from other states and not registering or applying for a Security Officers license. Francine explained that if the Security Officer was working for DAPL and receiving their paycheck from DAPL, then they did not require a North Dakota License.
2. Francine and I spoke about whether a North Dakota licensed Security Company could have security officers from DAPL working as a subcontractor for them. Francine told me this could happen as long as the officer made application with the licensing board and a full background was done by BCI and the FBI.
3. I asked Francine if I could get a roster of security officers that worked as DAPL security officers and Francine asked me to send my request via email.
4. 09/19/2016: I sent a request via email for the roster.
5. 09/21/2016: I spoke to SA Joe Arenz and SA Lindsey Wolt, ND Bureau of Investigation. SA Wolt is currently investigating an incident that occurred on September 03, 2016, that involved DAPL security officers and the pipeline protesters. SA Wolt told me she was in the process of having several security officers interviewed. These officers included several dog handlers.
6. 10/17/2016: I met with SA Joe Arenz. As of today's date Frost Kennels of Ohio have not been cooperative and no dog handler's interviews have been done. SA Arenz told me he has been provided a letter from the State of Ohio stating that Frost Kennels is not a registered security company in the State of Ohio. Through Social Media I have been able to identify (2) handlers, Richardo Bullard and Ashley Welch.
7. SA Arenz and I spoke about the private security and whether they have been registered through the NDPISB. At the time of the September 3 protest, 10-Code and Silverton were the two private security companies working for the DAPL pipeline. Silverton was possibly working under 10-Codes security license. The dog handlers were working under Silverton and were not registered as security officers under the NDPISB. I was told the intent was to eventually get the handlers registered and that on September 3, 2016 there was no intentions of using the dogs or handlers for security work. Because of the protest events, the dogs were deployed as a method of trying to keep the protesters under control.
8. I have been told Silverton is no longer doing any security work for the DAPL pipeline.
9. I spoke to Morton County ASA Gabrielle Goter about the report of dog handlers not being properly license through NDPISB. ASA Goter told me she felt any violations should be handled through NDPISB.
10. 10/18/2016: As of today's date there are several Security Companies working for the DAPL pipeline. **TigerSwan Security** is in charge of the DAPL Intelligence and overall supervisor of the other security companies. **Leighton Security** and **HE Security** are in charge of security for the DAPL equipment at the work sites. Leighton Security is working under HE Security. **10 Code Security** and **Russle Group Security** are in charge of drilling operations for DAPL. **SRG Security** is

in charge of filming operations. I was told by a 10 Code employee that SRG Security and Russle Group Security are working under 10 Code Security.

11. Through this investigation it has become evident that many security companies have been hired to do security work for the DAPL pipeline project. Although lists of security employees have been provided, there is no way of confirming whether the list is accurate or if names have been purposely withheld. Many of the initial security officers have come and gone and there is no way to prove who was doing security work. Through this investigation it has been proven that the dog handlers were not properly licensed to do security work in the State of North Dakota.
12. At this time this report and SA Joe Arenz's report will be forwarded to the Morton County States Attorney's Office and the ND Private Investigators and Security Board for possible charges.
